

Outdoor Distribution Cabinet

Applications:

The outdoor distributor is part of a modular range made of stainless steel for railway applications.

It serves to accommodate passive and active technology for control and safety systems as well as platform technology.

Technical Features:

Scope of Application:

- Outdoors, climate category T1 acc.to DIN EN 50125-3

Temperature of Application:

- -5 °C to +55 °C

Protection Index acc. to DIN EN 60529:

- IP54

Protection Class:

- SK 1, grounding to rail

Resistance Class:

- RC 3

RoHS-conformity acc. to:

- EU-directive 2011/65/EU of 08.06.2011

Material:

- Stainless Steel

Colour:

- Stainless steel bright

Cable Access:

- Through the socket under consideration of the cables' bending radius

Different Models:

- With mounting plate
- With 19" pivoting frame
- For copper-connecting terminals
- For FO-splice trays
